This form can be filled out by any business or person who is destroying the uncertified woodstove. An uncertified woodstove has not been tested to meet emission performance standards by DEQ or the U.S. EPA. In general, any stove manufactured prior to 1986 and without a DEQ or EPA certification label (http://www.deq.state.or.us/aq/burning/woodstoves/label.htm), is going to be an uncertified stove.

The uncertified woodstove or fireplace insert must be rendered incapable of being used as a heating device. It is also unlawful to sell, offer to sell, or give away an uncertified stove.

1) **Place of Destruction**

Name of Business (or Person Destroying Stove): __________________________________________________________

Address: __________________________________________________________________________________________

City/State/Zip Code: ______________________ Phone Number: _____________________________________________
