

# Greenhouse Gas Reporting Advisory Committee - Oregon DEQ

Ken Corum

NW Power and Conservation Council

October 19, 2009

## Interconnections of the North American Electric Reliability Council in the Contiguous United States, 1998

# How are Oregon loads related to emissions? - 1

- Oregon transmission? (I don't know anything about these emissions)
- Oregon load served by Oregon generation
- Oregon load served by generation located elsewhere
  - Oregon-owned generation
  - Non Oregon-owned, contract for specific generator
  - Non Oregon-owned, contract for system sale
  - E.g. Morgan Stanley, contract w/o attribution to any system or generator

# How are Oregon loads related to emissions? - 2

- Sales of Oregon-generated power elsewhere
- “null power” – leftovers after RECs are sold
- Emissions from integration of renewables
- Losses in transmission and distribution
