

## Tentative timeline for updates to Oregon's greenhouse gas reporting program

Key items:

- Greenhouse gas reporting advisory committee to hold five meetings and provide recommendations about DEQ's draft rules.
- DEQ to propose temporary rule amendments for adoption in December 2009 to create year one fees
- DEQ to propose a follow-up regular rulemaking for adoption in mid-2010 to expand reporting requirements to power importers and fuel distributors, align Oregon's rules with the Western Climate Initiative or federal rules and create future years' fees.
