<sup>1</sup> The abbreviations for non-applicability are as follows:

- a this pollutant is not emitted by the facility;
- b the facility is not in this source category;
- c the facility is not in the special control area;
- d the facility is not in this county;
- e the facility does not have this emissions unit;
- f the facility does not use this fuel type;
- g the rule does not apply because no changes have been made at the facility that would trigger these procedural requirements;
- h this method/procedure is not used by the facility;
- i this rule applies only to DEQ and regional authorities; and
- j other (explain on Form AR402, Non-Applicable Requirements)

- <sup>2</sup>
- ◆ indicates this rule contains a limit or standard that must be transferred to the appropriate Form EU500, Emissions Unit Summary;
  - indicates this rule contains a limit or standard that must be transferred to the Form AR403, Facility-Wide Applicable Requirements;
  - ◆■ indicates this rule contains a limit or standard that must be transferred to *both* Form AR403 and the appropriate Form EU500
