RE: Annual Report for Alternative Treatment Technologies, Recirculating Gravel Filters and Commercial Sand Filters

Permit Number:

Property Location:

In 2005 DEQ adopted rules that allow for Alternative Treatment Technologies (ATT) Recirculating Gravel Filters and Commercial Sand Filters [Oregon Administrative Rules (OAR) 340-071-0345, 340-071-0302, and 340-071-0290] to be installed in Oregon under a construction-installation permit provided that they are inspected and serviced by a certified maintenance provider at least once every six (6) months. We are sending you this letter so that you know that it is your responsibility as the system owner to **maintain a service contract with a certified maintenance provider to perform the required inspections and service until such time as the system is decommissioned.**

Each year certified maintenance providers are required to submit a report of the inspections and service they performed along with a \$60 fee for each system they provide maintenance to. Enclosed is a copy of the letter and forms we sent to them.

All reports for the 2010 calendar year are due by January 15, 2011. A list of certified maintenance providers is enclosed. I encourage you to contact your maintenance provider to ensure that the report and fee will be submitted and to ensure that your service contract is up to date. Please understand that the failure to submit the report and fee, and the failure to maintain a service contract are violations of Oregon environmental law and may result in formal enforcement actions.

If you have any questions regarding this letter, please call me at 541-686-7905 or toll free in Oregon at (800) 844-8467 extension 7905.

Thank you,

Lisa Fincher
