PORTLAND, OR 97266-3609

Re: Chrisman, Greg
File No.: 26-18-0617

Dear Greg Chrisman:

The Department of Environmental Quality has received a report and Soil Solutions certification concerning the heating oil underground storage tank (HOT) assessment and/or cleanup conducted at 4815 SE 100th Ave, in Portland, Oregon.

Soil Solutions was licensed to provide heating oil tank services and has certified that the cleanup has met the Department's requirements. The Department has registered this report and certification and closed its file on the project.

The decision to register the report and certification and to close the Department's file will no longer apply if new or undisclosed facts show that the project does not comply with the rules governing heating oil tank cleanups.

Please note that you are required by state law (ORS 105.464) to provide potential buyers a disclosure statement that includes information regarding underground storage tanks, HOTs and the environmental conditions on your property.

Accordingly, we recommend that you keep a copy of this letter, the certification and any reports of testing or corrective actions relating to your HOT with the permanent property records.

Your efforts to comply with Oregon's environmental rules and regulations to ensure that your heating oil tank has been adequately addressed have been appreciated. Proper decommissioning and cleanup helps ensure protection of the environment from future heating oil tank leaks and ensures that the heating oil does not adversely impact human health or the environment. If you have any questions, please feel free to contact the HOT Program at (503) 229-6170.

Sincerely,

Michael H Korten Hof, Manager
DEQ Heating Oil Tank Program
