Change is in the air.

The water tower cleanup project begins this Monday, November 16th, running 6:00 a.m. to 5 p.m. Monday through Friday for approximately three weeks. The material being excavated and taken away for disposal will have a strong odor, but is non-toxic. Wind blowing from the North will make the smell worse, but will get better when the winds shift. Rain will also help with the odor.

www.TroutdaleCleanup.org will have daily updates, contact information and links to learn more about the project. We appreciate your patience and apologize for the temporary odor.

✔ Three-week clean-up begins Nov. 16th
✔ Odor is **not** toxic
✔ Strength of odor will vary with weather

**Daily Updates**
